TROY, O., May 6 .- The Miami County grand jury composed of eleven men and four women-convened here again today, ostensibly for the purpose of considering the indictment of Jacob Nesbitt, self-confessed slayer of his wife, Frances Drake Nesbitt.

The jurors were expected to begin hearing evidence shortly after noon. The evidence, it was believed will consume three days and the indictment of the former salesman on charges of first or second degree murder is expected early next week.

For the past few days the jury has been considering routine cases. This work is virtually complete and the Nesbitt case is next on the cal-

County Prosecutor L. E. Harvey has summoned thirty-three witresses and the first of these has been instructed to be prepared to tell his story.

No one today was prepared to predict the nature of the indictment the jury may return. Nesbitt centessed he killed his wife during a "red rage" after she nagged him.

The murder was not premeditated he says. If less than a first degree charge is returned, he is expected to plead guilty. Such a plea would carry a sentence to life imprisonment, or

an indeterminate sentence at the

discretion of the court. Len Shipman, the accused man's attorney was non-committal as the jury convened. He admitted he has made no very copious plans for the defence of his client. This was incharge or a lesser indictment

#### THE CAIRO TEMPLE

THE younger Mr. Rockefeller dreamed a great dream. He saw, rising by the storied Nile, the facades and towers of a temple nobler than any erected by the genius or devotion of ancient Egypt to Isis or Osiris a temple dedicated to research into the origin of man, a fit repository for the archaeological and anthropological treasures of the land of the Pharaohs and their predecessors, with others from the far corners of the earth.

But Mr. Rockefeller's dream appears destined to become a shattered vision, so far as Egypt is concerned. He definitely has withdrawn his offer of a fund of \$10,000,000 to be devoted to such purpose.

The Egyptian Government thus loses a great opportunity for the enjoyment of an impressive distinction. It is to be trusted that the world is not to lose realization of the dream in concrete expression elsewhere.

Egypt is not the richest land in archaeological possibilities and importance-it is not the oldest relic of world civilization, as for so long was believed. The temple of Mr. Rockefeller's dream would answer every purpose of its coneption if located in New York, Cincinnati, London, Paris, Pekin or Lhassa. It should become a great institution of the present age, to endure through developing cultural generations yet to come.

The discoveries of archaeological and anthropological value that have been made during recent years, particularly in Mesopotamia and Mongolia, have much illuminated knowledge in these fields of research. The origin of man lies far in a past of almost inconceivable obscurity, but patient scientific seekers after truth, bit by bit, have been unfolding the wondrous tale of mortal earthly existence. French, English, Belgian, Italian, American and German expeditions have developed startling revelations. Dr. Roy Chapman

Andrews, in Thibet, has brought the antediluvian periods to the threshold of today. The British and French expeditions of recent years in the East have proved Nineveh and Babylon youthful in the mighty sweep of human civilization.

The refusal of the Egyptian Government promptly to take advantage of Mr. Rockefeller's generous offer is not surprising. The Oriental mind is century-cultured in duplicity and suspicion. It does not believe in unselfishness and individual honesty. It suspects ulterior motive back of every mortal act. It has no conception of altruism, of scientific impulse and effort. Its world view is limited by the frontiers of a cosmic material selfishness. Back of the jockeying over the acceptance of Mr. Rockefeller's proffered great gift to the nation may be found also the ancient vices of avarice and cupidity, with all their deterrent distractions.

#### INSANITY MENTAL STAGNATION

THE statement is frequently heard that such and such a person became insane over thinking about so and so. There is a quite universal impression that insanity is caused Jelly in many instances by overdoses of thinking. Every community remembers men and women who "went crazy" on religion, politics, science and invention and other so-called foods-for-thought. The sane neighbors of these insane thinkers cannot be budged from their convictions.

"Insanity comes from physical abuse and mental disuse," was the philosophy of Elbert Hubbard. As a historian and diligent reader he found no place in world history where a Using No. thinker became insane from thinking. As a traveler and any desired size, make a chain of student of sociology he directed the world to the mad houses (ch) three, fifteen trebles (tr) in to find millions of cases of insanity traceable to ignorance ring, join. and disuse of the mind. Where thinkers have lost their two, Tr in same stitch (st) with mind there have been physical weaknesses responsible.

Alienists and psychologists have recorded instances ing last two Ch to top of three where an inactive mind has become highly active in insanity. Men and women who are said to be "crazy on" religion, politics, and other subjects have not become so through deep thought on these subjects. In reality their insanity has repeat from \* around, ending with brought them into relationship with the subject of their unbalanced ravings.

Heredity and disease are considered the most common point causes of insanity, but society is fast becoming convinced of 14 Tr. \* Ch two, Tr under two of the source of insanity lying in ignorance and mental leth- Ch, Ch two, miss one Tr, 15 Tr argy. #### DISEASE GERMS

EVEN a disease so comparatively common and simple as influenza has its unpredictable developments. It has swept over Europe time and again and has been variously recorded in medical history. Labeled as a "plague" several times, it did not really deserve the name until the assault it made during the war period. And scarcely had its manifestations been studied and ticketed when it now appears in England in a new and startling form. Suddenness characterits present tactics. Persons are struck down in the street, in theatres and in restaurants without the usual warning shots. The bong study of disease germs is made longer by the fact that they sometimes seem to have the ability to change their ways and take humanity by surprise from some dimly understood ambuscade.

BERNARR

Pneumonia, or inflammation of the lungs, is an acute affection to which persons of all ages are liable. When the victim is apparently in fair health previous to contracting

the disease, its cause is usually at-

tributed to exposure of some kind. At the inception of the attack a violent chill is felt, and the temperature rises. The face becomes flushed, a hacking cough ensues, breathing is short and painful, and considerable pain is experienced in the affected region of the lung. The expectoration consists of a scanty sputum more or less tinged with blood. As the acuteness of the attack increases respiration becomes more labored and the face is tinged with a bluish pallor. The fever, the pains in the chest, and the difficulty in respiration reach the crisis at about the end of a week. The crisis is characterized by profuse night sweats, drop of temperature, a loosening of the cough, increased expectoration, disappearance of pain and improve-

ment in breathing capacity. With the return of appetite recovery is assured and rapid. Attacks of pneumonia often recur again and again in the same individual. The keynote of the treatment of pneumonia is: Radical and effective elimination accomplished by helping the action of the vital organs and assisting in the necessary physiological changes. Fasting is the most effective method of

combating this disease. The first measure to be adopted is the administration of an enema. A full warm enema should be used and thereafter one every day or two as it may seem necessary. Care must be taken that this does not says: "Before taking Lithiated overtax the strength of the patient. By MRS. SARAH TYSON RORER Philadelphia Cooking Expert

"I have just completed a special experiment on the 1926 model Perfection Oil Stove, testing it under all possible cooking conditions. I cooked many meals in my own kitchen. Every dish was deliciously cooked.

Immediate Cooking

"Steak began to broil and my molasses cake began to rise almost as soon as I lighted the burners. There was no waiting for the heat to 'come up.'

"The bottom of every utensil used in the experiment was as clean as a china dish. No scouring was necessary. Those long Perfec-

### "Why SOME Farmers Ain't Poor" "W. S. F. A. P." Club

Frank Wilson of Sugar Creek Township, joined the W. S. F. A. P. Club last week having duly qualified.

Frank came in Tuesday I think it was, and bought a Case Corn Planter.

Frank used an old-fashioned Corn Planter last year and owing to the inaccuracy of his apparatus, got a poor stand, not much corn and a NEW IDEA! He CASHED the idea Tuesday by purchasing the Case Planter! He ALSO got out a pencil and did some fig-gerin! Here's what the TOTAL came to.

"I LOST enuf last year in one-half hour of INAC-CUATE PLANTING to have BOUGHT TWO CASE CORN PLANTERS! I lost part of the crop, my time, the seed and was late in harvesting. Never again!"

There are three memberships open at this time in the W. S. F. A. P. Club.

Talk this over with me personally and I'll decide whether you can qualify.

Fraternally yours,

### Stop Dandruff! Beautify Hair With Danderine

Hair stops coming out and every particle of dandruff disappears.

Within ten minutes after an ap plication of Danderine you can not find a single trace of dandruff. One application dissolves every particle of dandruff; invigorates the scalp, stops itching and fall-

Furthermore Danderine is to the hair what fresh showers of rain and sunshine are to vegetation It goes right to the roots, invig orates and strengthens them. Its exhilarating, stimulating and lifeproducing properties cause hair to grow strong and beautiful.

Bobbed hair has made the girls aware of the dangerous effects of unsightly dandruff which is now more apparent than ever since the hair is short.

Danderine is a sure way to get rid of dandruff and immediately doubles the beauty of your hair The effect is amazing-your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable lustre, softness and luxuriance.

Get a small bottle of Danderine from any drug store or toilet counter for a few cents and keep that dandruff out of your hair and off your shoulders.

#### THE CAIRO TEMPLE

THE younger Mr. Rockefeller dreamed a great dream. He saw, rising by the storied Nile, the facades and towers of a temple nobler than any erected by the genius or devotion of ancient Egypt to Isis or Osiris a temple dedicated to research into the origin of man, a fir repository for the archaeological and anthropological treasures of the land of the Pharaohs and their predecessors, with others from the far corners of the earth.

But Mr. Rockefeller's dream appears destined to become a shattered vision, so far as Egypt is concerned. He definitely has withdrawn his offer of a fund of \$10,000,000 to be devoted to such purpose.

The Egyptian Government thus loses a great opportunity for the enjoyment of an impressive distinction. It is to be trusted that the world is not to lose realization of the dream in concrete expression elsewhere.

Egypt is not the richest land in archaeological possibilities and importance-it is not the oldest relic of world civilization, as for so long was believed. The temple of Mr. Rockefeller's dream would answer every purpose of its coneption if located in New York, Cincinnati, London, Paris, Pekin or Lhassa. It should become a great institution of the present age, to endure through developing cultural generations vet to come.

The discoveries of archaeological and anthropological value that have been made during recent years, particularly in Mesopotamia and Mongolia, have much illuminated knowledge in these fields of research. The origin of man lies far in a past of almost inconceivable obscurity, but patient scientific seekers after truth, bit by bit, have been unfolding the wondrous tale of mortal earthly existence. French, English, Belgian, Italian, American and German expeditions have developed startling revelations. Dr. Roy Chapman Andrews, in Thibet, has brought the antediluvian periods to the threshold of today. The British and French expeditions of recent years in the East have proved Nineveh and Babylon youthful in the mighty sweep of human civilization.

The refusal of the Egyptian Government promptly to take advantage of Mr. Rockefeller's generous offer is not surprising. The Oriental mind is century-cultured in duplicity and suspicion. It does not believe in unselfishness and individual honesty. It suspects ulterior motive back of every mortal act. It has no conception of altruism, of scientific impulse and effort. Its world view is limited by the frontiers of a cosmic material selfishness. Back of the jockeying over the acceptance of Mr. Rockefeller's proffered great gift to the nation may be found also the ancient vices of avarice and cupidity, with all their deterrent distractions.

#### INSANITY MENTAL STAGNATION

THE statement is frequently heard that such and such a person became insane over thinking about so and so. There is a quite universal mpression that insanity is caused Jelly in many instances by overdoses of thinking. Every community remembers men and women who "went crazy" on religion, politics, science and invention and other so-called foods-for-thought. The sane neighbors of these insane thinkers cannot be budged from their convictions.

"Insanity comes from physical abuse and mental disuse," was the philosophy of Elbert Hubbard. As a historian and diligent reader he found no place in world history where a Using No. 20 crochet thread, or thinker became insane from thinking. As a traveler and any desired size, make a chain of student of sociology he directed the world to the mad houses (ch) three, fifteen trebles (tr) in to find millions of cases of insanity traceable to ignorance ring, join. and disuse of the mind. Where thinkers have lost their two, Tr in same stitch (st) with mind there have been physical weaknesses responsible.

Alienists and psychologists have recorded instances ing last two Ch to top of three where an inactive mind has become highly active in insanity. #### DISEASE GERMS

EVEN a disease so comparatively common and simple as influenza has its unpredictable developments. It has swept over Europe time and again and has been variously recorded in medical history. Labeled as a "plague" several times, it did not really deserve the name until the assault it made during the war period. And scarcely had its manifestations been studied and ticketed when it now appears in England in a new and startling form. Suddenness characterits present tactics. Persons are struck down in the street in theatres and in restaurants without the usual warning shots. The long study of disease germs is made longer by the fact that they sometimes seem to have the ability to change their ways and take humanity by surprise from some dimly understood ambuscade.

Greene County History

OF COUNTY

TOPOGRAPHY AND GEOLOGY

Principal topographical or sur face features of Greene County are the valleys of the Little Miami River and Beaver Creek. Caesars Creek also forms a depression of considerable importance in the southeastern townships. To these three valleys all the drainage of the county is directed, with gift. Like a rare gem that you the exception of that of Bath Twp. which lies within the valley of Mad River.

Even though Beaver Creek is a much smaller stream than the Little Miami, its valleys are a much wider and deeper trough. However, the drainage effected by the former stream is insignificant when compared with that of the larger one.

Beaver Creek is a small, sluggish stream which is almost lost in its wide, fruitful valley. No one can fail to recognize the dis proportion existing between the present stream and the valley which contains it.

This wide valley was never excavated by Beaver Creek, for it is the deserted channel of an old river which must have had greater force and greater volume than

the Little Miami today. Nor is there any doubt as to the general course and tributaries of the river that did this work, for Beaver Creek valley connects on the north with Mad River's val-

Whether the water or headsprings of Beaver Creek shall be delivered to the Little Miami or Mad River depends upon the digging of a ditch or the turning of a furrow.

Tis a slow march to glory and , Beaver Creek valley is but an extension of the valley of Mad River, and was occupied by that stream at a not far remote period. This point is made clear by an examination of the geological map of the county, upon which the alluvial valleys of the county are

It seems probable Beaver Creek valley was formerly occupied by the waters of the Great Miami after it had been re-enforced by the whole volume of Mad River. With such an origin, present dimensions of the valley are easily

# What 30 Years of Cooking

taught Mrs. Rorer about Stoves

By MRS. SARAH TYSON RORER Philadelphia Cooking Expert

"T PREFER oil stoves to any other kind. I speak from the fullness of 30 years' experience with them. Oil is clean, economical, and dependable. It saves a world of work. No coal or wood to carry in, no ashes to carry out. And no dust.

"I have just completed a special experiment on the 1926 model Perfection Oil Stove, testing it under all possible cooking conditions. I cooked many meals in my own kitchen. Every dish was deliciously cooked.

Immediate Cooking

"Steak began to broil and my molasses cake began to rise almost as soon as I lighted the burners. There was no waiting for the heat to 'come up.'

"The bottom of every utensil used in the experiment was as clean as a china dish. No scouring was necessary. Those long Perfec-MRS. RORER is one tion chimneys certainly are in-

surance against sooty kettles. All at the Same Time

"I cooked many things at once. For boiling beef I used a very low flame. I French-fried potatoes over a hot flame with yellow tips about 11/2 inches high above the blue area. I cooked white sauce over a medium flame.

"I used all grades of heat at the same time satisfactorily. All flames remained steady and even. They did not creep or 'crawl.' This is a real blessing to the cook. She can forget her stove and keep her mind on her cooking.

"Very Well Satisfied"

"Altogether I was very well satisfied with the Perfection Stove. And, my good opinion of oil stoves has increased, if that is possible." 4,500,000 In Use

The other five famous cooks were enthusiastic about the 1926 Perfection, too. And every day 4,500,000 women get real cooking satisfaction from their Perfections. You, too, will get the most cooking satisfaction the year around when you cook on the latest model Perfection.

## "Why SOME Farmers Ain't Poor" "W. S. F. A. P." Club

Frank Wilson of Sugar Creek Township, joined the W. S. F. A. P. Club last week having duly qualified.

Frank came in Tuesday I think it was, and bought a Case Corn Planter.

Frank used an old-fashioned Corn Planter last year and owing to the inaccuracy of his apparatus, got a poor stand, not much corn and a NEW IDEA! He CASHED the idea Tuesday by purchasing the Case Planter! He ALSO got out a pencil and did some fig-gerin! Here's what the TOTAL came to.

"I LOST enuf last year in one-half hour of INAC-CUATE PLANTING to have BOUGHT TWO CASE CORN PLANTERS! I lost part of the crop, my time, the seed and was late in harvesting. Never again!"

There are three memberships open at this time in the W. S. F. A. P. Club.

Talk this over with me personally and I'll decide whether you can qualify.

Fraternally yours,

Wm. B. McCallister, Chief Poobah, W. S. F. A. P.

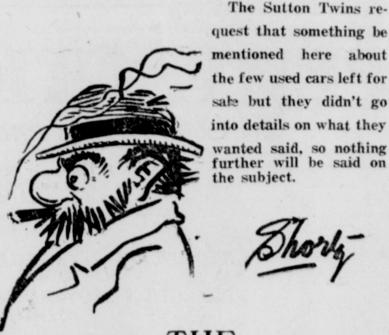

#### General News-Mostly Respectable.

Hutch sold ALL the lawn mowers the Mast, Foos Company of Springfield made this year and is now hard at work on the Philadelphia Lawn Mower Company's output. He got in 5 carloads Wednesday week and expects 6 more carloads the coming Tuesday.

The warm, balmy weather of last week was much appreciated by Mister Beal, who on account of "playing" a large 15-lb. catfish was pulled along the bank through the underbrush and barbwire thereby causing him to tear out the bosom of his pants! On account of the extreme weather, Mister Beal not only suffered a great loss in dignity but also contracted a severe case of sunburn. Jake, over at Sayre's supplied him with a good brand of Freckle Lotion and Mister Beal is expected to appear as usual from now on.

Dan Smith came in Saturday with a split tire and traded a tire man for a new one giving him \$7.50 to boot. Dan says that's better than having the old one vaccinated!

Ask Jack to tell you the story of the farmer with the sick calf. Would tell it here but Beeler of the Gaette won't allow it.
